

AIR AND ENVIRONMENT SANITISATIONS

with **OZONE SYSTEM**

FOR ENTERPRISES, PRIVATE AND PUBLIC ENTITIES

SANITISES ENVIRONMENT
DEGRADES BACTERIA
INACTIVATES VIRUSES
SANITISES CLOTHING AND FOOTWEAR
DESTROYS BACTERIA, FUNGI AND MILDEW

A SAFE ENVIRONMENT FOR CUSTOMERS AND EMPLOYEES

During this special time for the entire Country, we offer services specially conceived for schools, shops, offices, shopping malls, restaurants, public transports, private dwellings and other areas, for sanitizing the same environments from Covid-19 and from other infectious agents like bacteria, spore and other kind of virus. We have products, facilities and also technical skills to perform the sanitisation of these environments and we issue a certificate proving it.

Furthermore, we do several integrated services of cleaning, portorage, pest control and local sanitisation, to ensure the safety in all the environments.

OPERATING PROCEDURES

All the sanitisation services are done with specific facilities that can transform the input air Active Oxygen through the Oxygen activation.

Unlike the common sanitisation systems, the O₃ molecules easily reach all the surfaces, even the hidden ones, for a lasting and powerful environment sanitisation.

The O₃ action sanitises the air from bacteria, fungi and mildew.

We perform sanitisation services at any time without interfere with the work activities.

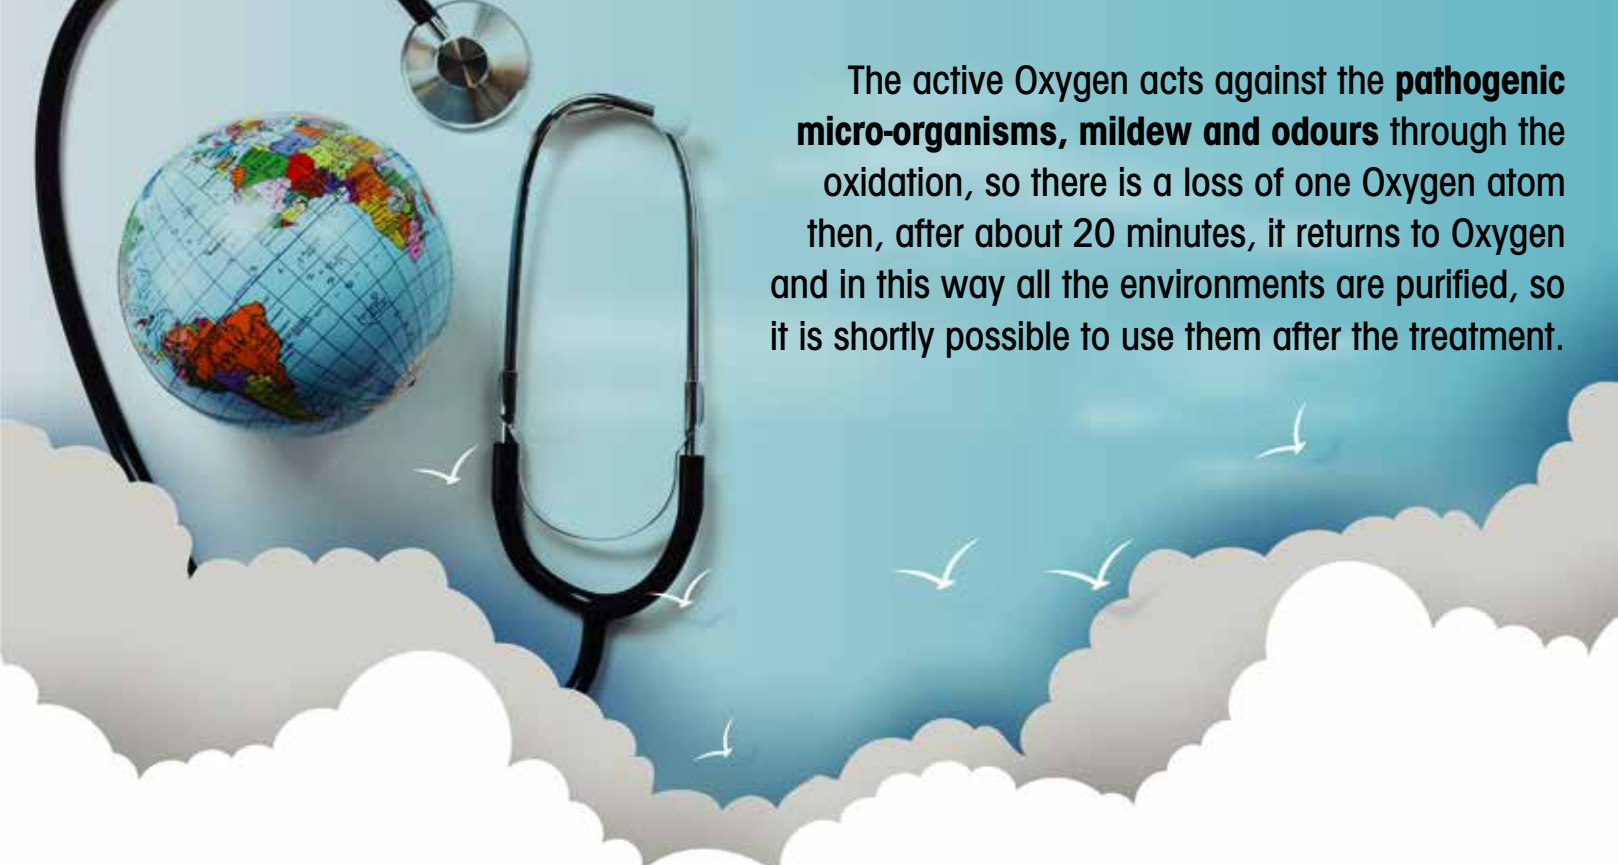

FURTHER INFORMATION

The service is done by a capable staff that prepares and activates the machinery in the place which must be sanitised, considering the time needed related to the size of the area.

RESTAURANTS, PIZZERIA, BAR, DINERS, LOCALS, PUB, APARTMENTS,
HOSPITALS, PRIVATE HOSPITALS, CLINICS, SANITARY SPACES,
DENTAL OFFICES, DRUG STORES, LIBRARIES AND SCHOOLS,
INDUSTRIAL AND COMMERCIAL ACTIVITIES.

The active Oxygen acts against the **pathogenic micro-organisms, mildew and odours** through the oxidation, so there is a loss of one Oxygen atom then, after about 20 minutes, it returns to Oxygen and in this way all the environments are purified, so it is shortly possible to use them after the treatment.

CERTIFICATION OF PERFORMED SANITISATION

The AFS Consortium Society guarantees the correct usage of products and facilities, involves a high staff quality, so capable that can do the service in complete autonomy not being invasive.

Thanks to this, our society can issue a Declaration of "occurring sanitisation" that guarantees to the enterprises, and to all the customers, a quality and a total trust in the services we offer.

PROTECT YOUR ENTERPRISE AND YOUR EMPLOYEES

SO MANY ADVANTAGES OF A PROFESSIONAL AND RIGOROUS SANITISATION:

- MAKE SAFE YOUR ENVIRONMENTS
- TAKE ADVANTAGE AND RECOVER THE 50% OF THE COSTS THROUGH THE GOVERNMENT INCENTIVES.
- REDUCE THE CONTAGION RISKS

THE MAIN BENEFITS

The sanitisation activity is characterized by all the services that sanitise and make the environment safe. Sanitising means the improvement of the air, damp, light and ventilation and conditions but at the same time it guarantees the complete lack of organism and micro-organisms that could be dangerous to health.
